## EDUCATION

### BSc (Hons) Computer Science

Univ. of Bedfordshire (Top-up)

*Planned Specialization*

### Higher Diploma in IT

SLIIT City Uni

*Final Semester (Current)*

### Foundation Cert. in IT

SLIIT City Uni

*Completed*

### G.C.E. Ordinary Level

St. Joseph Vaz College

**Achievement: 9 'A' Distinctions**

## CERTIFICATIONS

### Certificate in AI

SLIIT City Uni

*Machine Learning & Models*

### Diploma in English

BCI Campus

*Professional Communication*

# L.B. LOCHANA CHAMOD

## COMPUTER SCIENCE UNDERGRADUATE | FULL-STACK DEVELOPER

Final-semester IT undergraduate completing the **Higher Diploma in Information Technology** at SLIIT City Uni, with planned progression into the **BSc (Hons) Computer Science** top-up with the University of Bedfordshire. I build production-oriented full-stack systems using **Next.js, React, Node.js, Express, PostgreSQL, Prisma, Payload CMS, WebSockets, Docker, and modern testing tools**. My strongest work includes an enterprise restaurant management platform for a real client and a government-facing AEO portal developed during my internship at Sri Lanka Customs Headquarters.

## INDUSTRIAL EXPERIENCE

### Full Stack Software Engineering Intern – RMU

Sri Lanka Customs

**CUSTOMS HEADQUARTERS, COLOMBO | DEC 1, 2025 – JAN 31, 2026 | FULL-TIME WEEKDAYS (MON-FRI)**

Worked with senior developers, engineers, and IT industry professionals on the Authorized Economic Operator (AEO) web portal and internal RMU software initiatives.

- Served as a major implementation contributor for the AEO portal, working mainly on the Lochana branch before it was merged into main.
- Contributed 39 visible Git commits and helped bring the portal to a production-ready release state under senior developer supervision.
- Worked across frontend UI, CMS-driven rendering, responsive design, animations, SEO metadata, and 3D visualization features.
- Also contributed to RMDS development, LocAI SyndicateHunter, RMS Simulator, Tariff Management Software, and customs-related web system improvements.
- Completed the available internship period with prior notice, as compulsory final-semester academic attendance requirements conflicted with the remaining internship schedule.

## ENGINEERING PROJECTS

### Ammehula Restaurant & Cafe Integrated Management System

Next.js • Express • PostgreSQL

Enterprise-grade restaurant management platform for Ammehula Cafe, Negombo, delivered as Lead Full Stack Software Engineer for a 2-year real-client university PPA project. Repository: [github.com/lochanachamod/ammehula-system](https://github.com/lochanachamod/ammehula-system).

- Led full-stack architecture across customer ordering, admin operations, POS, KDS, delivery logistics, CRM, menu engineering, and smart inventory ERP.
- Designed a 40-model PostgreSQL and Prisma schema with JWT/RBAC security, audit logs, inventory, procurement, POS, delivery, loyalty, reservations, campaigns, and feedback workflows.
- Built real-time workflows with Socket.io, GIS delivery validation with Leaflet/Turf.js, automated procurement PDFs, Docker Compose deployment, and a 39-spec Cypress E2E suite.

### Sri Lanka Customs AEO Portal

Next.js • React • Payload CMS

Modern Authorized Economic Operator web portal for Sri Lanka Customs, finalized for production on the main branch with release version v1.2.2 on May 6, 2026.

- Developed major frontend and UX features on the Lochana branch, later merged into the production-ready main branch.
- Built responsive CMS-driven sections for hero content, benefits, companies, articles, process flows, tiers, testimonials, downloads, settings, and footer content.
- Developed the 3D Global Reach visualization and improved animations, dark/light theme behavior, SEO metadata, and mobile polish.

TECH SKILLS

FRONTEND

- Next.js
- React
- TypeScript
- JavaScript
- Tailwind CSS
- Shadcn UI
- Radix UI
- React Query

BACKEND & DB

- Node.js
- Express.js
- REST APIs
- PostgreSQL
- Prisma ORM
- SQLite
- Payload CMS
- JWT / RBAC

ENGINEERING

- Java (OOP)
- Python
- PHP
- C / C++
- WebSockets
- Socket.io
- Docker
- Git / GitHub

SPECIALIZED TOOLS

- Three.js
- Leaflet / Turf.js
- Cypress
- Playwright
- Vitest
- PDFKit / jsPDF
- Pandas
- Firebase
- Android Studio

PROFESSIONAL STRENGTHS

- Takes ownership from requirements to deployment-ready delivery.
- Comfortable learning new tools quickly and applying them in real projects.
- Strong problem-solving mindset across frontend, backend, database, and testing.
- Able to work with senior engineers, real clients, and structured feedback.

RMDS, LocAI SyndicateHunter & RMS Simulator

Customs RMU Projects

Supported multiple RMU development initiatives connected to customs risk management workflows, tariff management, simulation tools, debugging, and professional software delivery with senior engineers.

Additional Projects

Portfolio

Built additional academic and self-directed projects including ShipMate Logistics, GameSpotter E-Commerce, AI Match Outcome Predictor, Readify, FilmFolio, and OSINT Geo-Tracker. View more work at [lochanachamod.github.io](https://lochanachamod.github.io) and [github.com/lochanachamod](https://github.com/lochanachamod).

ACADEMIC MODULES

- Design & Analysis of Algorithms
- Data Structures (DSA)
- Object Oriented Programming
- Computer Security & Networks
- Database Management Systems
- Software Engineering Process

CORE COMPETENCIES

- Full-Stack Architecture
- Database Design & ORM
- Real-Time Systems
- E2E Testing & QA
- DevOps & Containerization
- Client Requirement Analysis
