PROFESSIONAL SUMMARY

Software Developer at Eternal Hosting building and improving production web platforms across frontend and backend engineering. Work spans responsive interfaces, backend systems, databases, performance, accessibility, SEO, testing and maintainable software delivery.

Previously contributed to software and web initiatives within the Risk Management Unit at Sri Lanka Customs.

Engineering projects extend into distributed systems, Linux observability, desktop AI, native Android and applied machine learning.

PROFESSIONAL EXPERIENCE

Software Developer

Jun 2026 – Present

Eternal Hosting | Remote

- Develop and improve production web platforms and hosting-related software across frontend and backend engineering.
- Build responsive interfaces and backend functionality with emphasis on performance, accessibility, SEO and maintainability.
- Use Git/GitHub workflows, testing and QA practices to support reliable software delivery.

Software Engineering Intern

Nov 2025 – Apr 2026

Sri Lanka Customs · Risk Management Unit | Colombo, Sri Lanka

- Contributed to software and web initiatives within the Risk Management Unit alongside senior technical staff.
- Built and improved responsive web interfaces, CMS-driven functionality and general data-processing tooling.
- Contributed to the Authorized Economic Operator (AEO) web portal using Next.js, Payload CMS and Three.js.

SELECTED ENGINEERING PROJECTS

AMMEHULA | Full-Stack Product Engineering

- Developed an end-to-end restaurant operations platform covering ordering, POS, kitchen workflows, CRM, inventory and delivery logistics.
- Implemented real-time workflows, access control and operational data flows using Next.js, Express, PostgreSQL, Prisma and Socket.io.
- Used Docker and Cypress within development/testing workflows.

SELECTED ENGINEERING PROJECTS

CORESTREAM ENGINE | Distributed Systems

github.com/lochanachamod/corestream

- Built a Rust-based distributed event-streaming engine exploring low-level performance, memory-mapped I/O and fault tolerance.
- Used Tokio, Protobuf and Raft-based concepts with Node.js/Python client tooling.

LOC-AI ASSISTANT | Desktop AI / Local + Cloud Inference

github.com/lochanachamod/LOC-AI

- Built a cross-platform Electron/Node.js AI coding assistant combining cloud inference with local Ollama inference.
- Added document-context extraction with OCR/PDF parsing and streamed responses.

SENTINEL-eBPF | Security / Systems

github.com/lochanachamod/sentinel-ebpf

- Built a Linux observability project using eBPF/C hooks for process and network telemetry.
- Developed a Go userspace pipeline and React visualization layer with container-aware telemetry.

ADDITIONAL SELECTED WORK

Cricket Match Predictor · FilmFolio · GameSpotter · Patient Record System · Readify · ShipMate

TECHNICAL SKILLS

LANGUAGES	TypeScript · JavaScript · Python · Java · PHP · Rust · Go · SQL
FRONTEND	Next.js · React · Tailwind CSS · Three.js · HTML · CSS
BACKEND & APIs	Node.js · Express · REST APIs · WebSockets · JWT/RBAC
DATA & ML	PostgreSQL · MySQL · MongoDB · Prisma · Firebase · Pandas · Scikit-Learn
SYSTEMS & PLATFORMS	Linux · Docker · eBPF · Electron · Android · Ollama
QUALITY & DELIVERY	Git · GitHub · Cypress · Playwright · Performance · Accessibility · SEO

EDUCATION

BSc (Hons) Computer Science

University of Bedfordshire, UK
Starting September 2026

Higher Diploma in Information Technology

SLIIT City Uni
Completed

Foundation Certificate in Information Technology

SLIIT City Uni
Completed

G.C.E. Ordinary Level

St. Joseph Vaz College
9 A passes

CERTIFICATIONS

Certificate in AI

SLIIT City Uni
Machine Learning & Models

Diploma in English

BCI Campus
Professional Communication
